PROFESSIONAL SUMMARY

Aspiring Data Engineer with hands-on experience in **SQL**, **Python**, and **AWS**, currently working on building batch ETL pipelines using **Sqoop**, **Hive**, and **Apache Spark**. Skilled in data processing, transformation, and working with structured datasets. Familiar with distributed data processing concepts and actively developing expertise in **Spark** and data pipeline architectures. Currently gaining practical exposure through an AWS Cloud Internship, working with **EC2**, **S3**, **IAM**, and **VPC**. Passionate about building scalable data solutions and preparing for Data Engineering roles.

WORK EXPERIENCE

Scope Tech Software Solutions

AWS Cloud App Developer Intern (TN Skills) – Jan 2026 to Present

- Configured and managed AWS services (EC2, S3, IAM, VPC) for cloud-based environments, improving deployment efficiency by ~30%
- Implemented **secure access control using IAM roles and policies**
- Designed and configured **basic VPC architecture** including subnets and networking components
- Deployed and tested cloud resources, reducing manual configuration effort by ~25%

Troika Research Technologies

Customer Support Executive – Jan 2024 to Sep 2025

- Handled 50+ customer interactions daily with high accuracy in data verification
- Improved call handling efficiency through structured communication and process adherence
- Maintained over 95% data accuracy while updating customer records
- Developed strong communication, attention to detail, and customer interaction skills.

TECHNICAL SKILLS

Programming Languages: Python | SQL

Big Data Technologies: Apache Spark (PySpark) | Hive | Hadoop (Basics) | Sqoop

Cloud: AWS (EC2, S3, IAM, VPC)

Data Engineering: ETL Pipelines | Data Transformation | Data Cleaning | Data Modeling | Data Warehousing

Databases: MySQL

Libraries: Pandas | NumPy

Soft Skills: Problem-Solving | Analytical Thinking | Adaptability | Teamwork | Time Management

Tools: Git | TablePlus | Jira

PROJECTS

1. Batch ETL Pipeline using Sqoop, Hive, and Apache Spark (Developing)

- **Project Objective:** Build a time-based batch ETL pipeline to extract data from MySQL, process it using Apache Spark, and store it in Hive for analytical querying.
- **Approach:** Designed and implemented a periodic data pipeline where data is incrementally ingested from MySQL into HDFS using Sqoop. Created Hive external tables to manage and query raw data. Processed large datasets using PySpark and Spark SQL by applying filtering, aggregation, and transformation logic. Automated the pipeline execution using scheduled jobs to simulate real-world batch processing systems.
- **Technologies used:** MySQL, Sqoop, HDFS, Hive, Apache Spark (PySpark, Spark SQL), ETL, Cron Scheduling

2. Portfolio Website

- **Project Objective:** Build a personal portfolio website to showcase technical projects, data engineering work, and front-end development skills.
- **Approach:** Designed and developed a responsive web portfolio using HTML, CSS, Tailwind CSS, JavaScript, and React.js. Focused on creating a clean, modern user interface with smooth navigation and reusable components. Integrated dynamic project sections to highlight Data Engineering and Visualization work, ensuring performance optimization and scalability.
- **Technologies used:** HTML, CSS, Tailwind CSS, JavaScript, React.js

EDUCATION

Course	Institution	Year
Bachelor of Engineering (Computer Science & Engineering)	Nehru Institute of Engineering and Technology	2019 - 2023
HSC	SDA Matric Hr Sec School	2018 - 2019
SSLC	SDA Matric Hr Sec School	2016 - 2017
